

# Bring Some Colour into Model Nature!

## Flowers

Flowers can be found virtually everywhere. For example, roses, tulips, dahlias and daffodils are specifically planted in gardens and flower beds. But we can also find daisies, primroses, cornflowers, lavender and many other colourful species in the great outdoors, at the edge of forests or paths and by streams and ponds.

Our Flowers are a wonderful little innovation: in a bed made of 4 mm-long green fibres are some 9 mm-long fibres that have been flocked in colour. In this way, wonderfully natural-looking flower beds can be reproduced in a model.

Each of the two sets contains a total of 250 flowers in five different colours.

The colours of the flowers in the set with reference 06800 are more colourful overall. With this set, tulips, roses, narcissi, daisies, daffodils, dahlias, and many more can be planted in a model.

The colours of the blossoms in the set with reference 06805 are slightly more muted and thus ideal for less flashy flowers. They are therefore suitable for cornflowers, lavender, forget-me-nots and various forest and meadow flowers. The Flowers are removed from the box and fixed in the model landscape with a drop of adhesive.

We recommend you use NOCH Landscaping Glue (ref. 61133), but hot glue or all-purpose glue are also ideally suited.

## H0, TT and N Gauge Figures Advent Calendar

 With its beautiful cover picture, the Figures Advent Calendar in A3 format is an absolute eyecatcher. You can look forward to a new figure when you open a little door every day – an ideal gift for any modeller!

**Expected release:** October 2022

**Note:** There are model railway figures in the calendar, but no winter or Christmas figures. Further information on the new Figures Advent Calendar will be published in autumn 2021.

**Our new Figures Advent Calendar comes out in October 2022!**

**History highlight:** Back in 2009, NOCH launched the first edition of the Figures Advent Calendar for modelling fans of H0, TT and N gauges. Since then, a calendar has been published every year with a new compilation of figures and a new, beautiful winter or Christmas motif. Our Advent Calendars are very popular, which is certainly also owing to the great picture motifs. The dioramas for the photos are sometimes built specially for the Advent Calendars, requiring a great deal of money and effort. We could save ourselves the hassle, but we're of the view that it's worth the effort.

### Architecture Line

We have developed a small range of white figures in 1:100 scale specially for architecture modellers. These are ideal for designing unostentatious architectural models.

### H0 Straw Bales

The dried stalks that are left over when grain is harvested are called straw. It is pressed into bales to make it easier to transport and to save space. In agriculture, straw is used as feed and bedding. But it is also used as insulation in construction, fuel or raw material for huts, mats and baskets.

The pack contains 36 model straw bales, each 0.5 cm x 0.8 cm x 1.2 cm in size.

# For Modelling Pros Who Demand Quality and Innovation!

## Sound Scenes

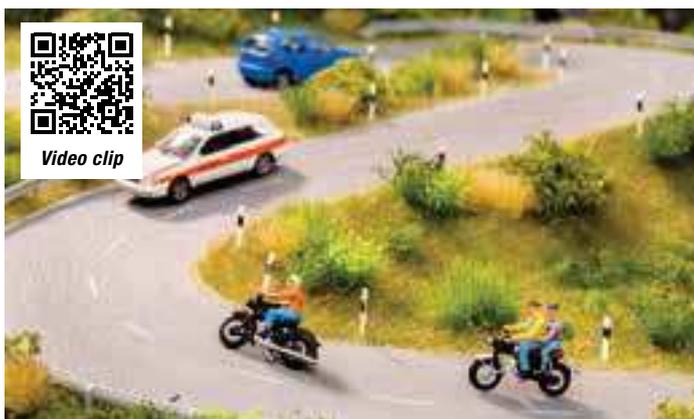

We're excited about the new additions to the NOCH Sound Scenes: alongside bleating sheep, track workers and motorbikes will now also make a racket in your model landscape!

The connection is made via a standard 16 V model railway transformer. The sound has a duration of approx. 20 seconds. Suitable for AC and DC. **Expected release: August 2022**

**History highlight:** NOCH invented the Sound Scenes in 2015. A little innovation! The lovingly designed and detailed painted NOCH Figures are delivered combined with a small loudspeaker, which provides high-quality sound for the discerning modelling professional to support the represented scene acoustically. During the conception phase, it was originally planned to equip the Sound Scenes with a simple 'greetings card speaker'. However, the quality didn't convince us, which is why we decided to equip the NOCH Sound Scenes with a high-quality

My favourite new item are these pieces of realistically moving Playground Equipment with matching children's figures. What a great memory of your own childhood.

## Now Movement Comes into Play!

### micro-motion Children's Playground

Almost all of us should have fond childhood memories of playgrounds and individual pieces of playground equipment. The swing on which we were often pushed for hours by our parents; the roundabout that made us feel dizzy, or the seesaw that was so difficult to balance on.

Playgrounds can be found in every city and village and are therefore an important part of human coexistence. Families meet, children laugh and play, parents talk about work and parenting, and some of the latest items of gossip and tittle-tattle are exchanged while their offspring have a go on the swings.

After last year's smash hit, the Tree with Swing (ref. 21768, see also page 27), we set out to develop four moveable pieces of playground equipment: a seesaw, a classic swing, a bird's nest swing and a roundabout. The handpainted playground equipment and model figures come completely assembled. Each device is powered by a motor that is located directly underneath the model (installation depth 3.5 cm). The mechanism for the drive is supplied as a kit. The electronics supplied can be connected to a standard 16 V model railway transformer and are suitable for AC and DC. The speed of the playground equipment can be set on the circuit board.

# Lively Scenes for Your Model Landscape

## H0 Themed Figures Set

This year, everything in our themed worlds revolves around 'trade and commerce'. The Themed Figures Sets make your model scenes come alive, as the lovingly designed figures and matching accessories are elaborately handpainted and each depict a self-contained scene.

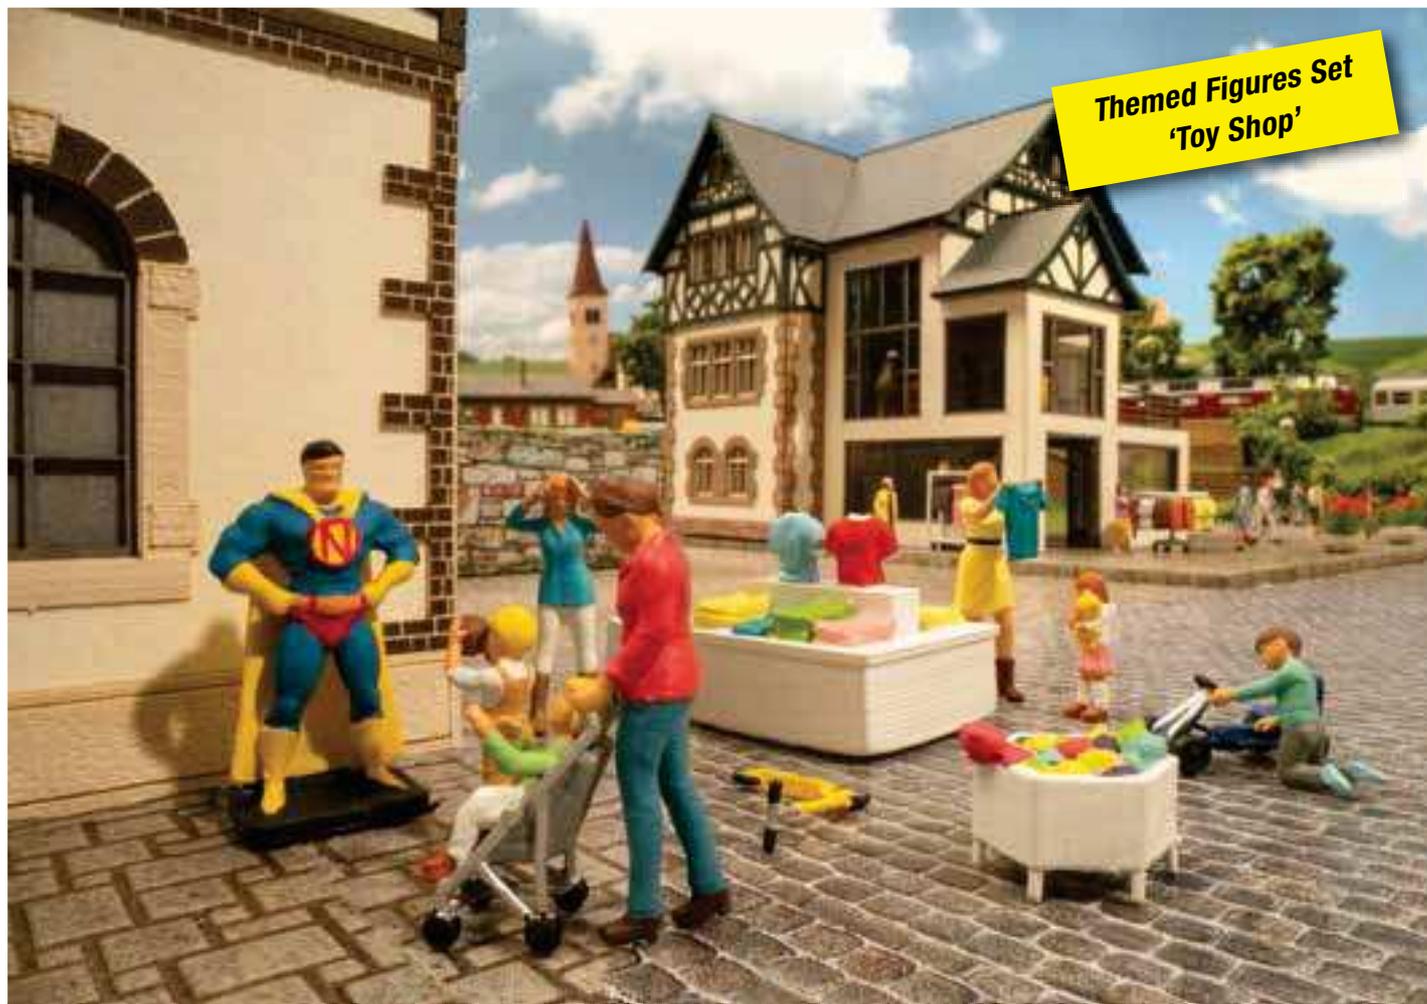

**Expected release:** November 2022

**Tip:** view the Themed Figures Sets on our website, [www.noch.com](http://www.noch.com). You'll find many additional decoration ideas relating to the individual scenes there.

**Montserrat Garcia Export**

It's so easy to reconstruct any scene with the Themed Figures! No more excuses; so many details make it so much fun!

### Themed Figures Set 'Toy Shop'

Do you remember your childhood? What was the most important business in town back then? The toy shop, of course! As children, we pressed our noses against the window and admired the colourful, diverse offerings. Then, as now, mothers and fathers try to get their offspring to move on, but the colourful toy world is simply too alluring.

## We're Reforesting!

### H0 and TT Saplings with Tree Props

Newly planted trees don't yet have well-branched roots in the soil to give them stability. Saplings are thus exposed to strong winds without protection and any movements of the root ball can jeopardise their growth. That's why any newly planted tree should be propped up.

# Timber!

## micro-motion Falling Tree 'Fir Tree'

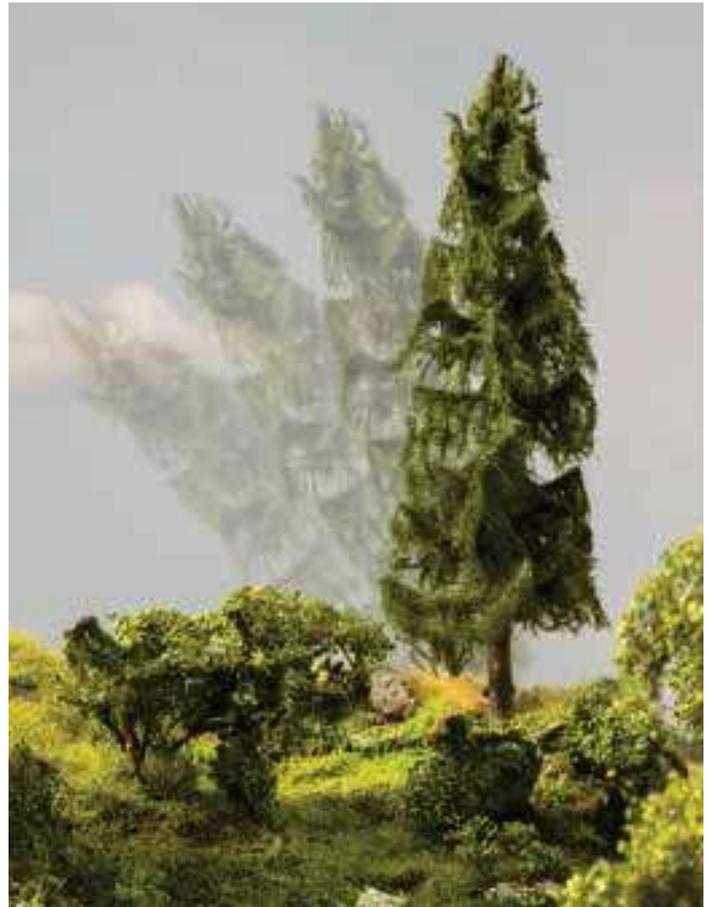

Model scenes frequently captivate people with little gimmicks and surprises that they don't suspect at first glance. The Falling Tree is just such a gimmick. The viewer is very surprised when an imposing 17 cm tree falls to the ground completely unexpectedly at the edge of the forest.

The trick behind this is extremely simple: there is a servo under the tree that brings it down realistically; slowly at first, and then faster until the tree finally hits the ground. After about 8 seconds, the tree stands up again on its own.

**HO TT** 21775 **micro-motion Falling Tree 'Fir Tree'** **NEW**  
Overall 18.2 cm high (height of fir tree 17 cm; installation depth for drive 1.2 cm)

The Falling Tree is an impressive, extremely realistically handmade, twisted wire tree that is elaborately flocked. The electronics supplied can be connected to a commercially available 16 V model railway transformer and are suitable for AC and DC. **Expected release: September 2022**

### Matching accessories:

**This is how you make the scene even more realistic**

The HO Sound Scene 'Felling Trees' (ref. 12843) is a great addition to the Falling Tree.

The original set contains six lumberjacks wearing helmets and protective clothing as well as the sound electronics with a loudspeaker. Since the loudspeaker is installed directly next to the Falling Tree (e.g. in a bush, in the ground or in a small hut), the viewer has the impression that the sound is created in the scene.

Realistic tree-felling noises such as chainsaws etc. can be heard for about 20 seconds when the sound is activated.

The Sound Scene electronics can also be connected to a commercially available 16 V model railway transformer.

Makes the sound of a chainsaw with a starter.

# NOCH Easy-Track – Finally Also for N Gauge!

## N Easy-Track Railway Route Kit 'Mittelberg'

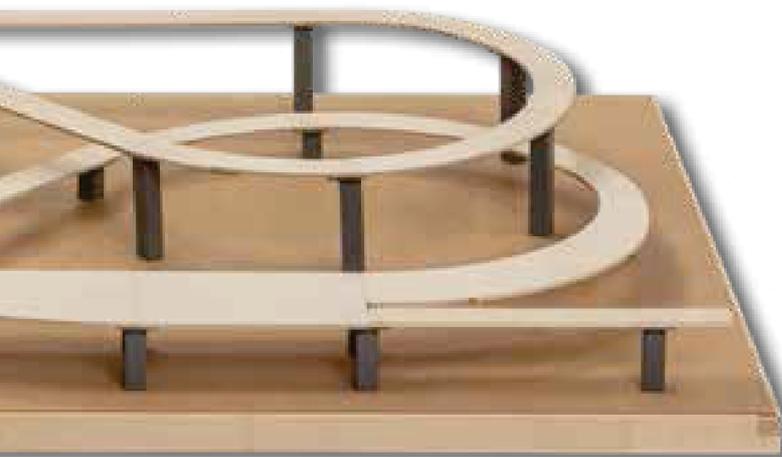

With the Easy-Track Kit 'Mittelberg', we are introducing a wonderful layout kit for N gauge. The varied route goes not only around the model railway landscape but also across it. A change of direction without a reverse loop makes the track plan exciting. A passing loop, a siding and the beautiful course of the route provide plenty of variety during operation. The layout can be operated analogue with two trains, which can alternate between doing their laps. In digital operation, the route network is large enough for two trains to do their laps simultaneously without disturbing each other.

The Fountain is my favourite new item. There are many unique fountains in countless cities. Some of them are world-famous. Give your model city centre a very special highlight.

## An Ornament for Any Square!

### City Fountain

Fountains can be found in virtually every village and market square and create a unique atmosphere. Whether it's a village fête, a market or gastronomy, village life mostly revolves around the central fountain.

The City Fountain for H0 gauge is a particularly attractive object. The fountain has a footprint of 10 cm x 10 cm and is 7.5 cm high including the statue.

The statue on the fountain represents a Valkyrie and is 3.5 cm high. Valkyries originate from Norse mythology and can often be found as statues or fountain figures.

The fountain itself is made of the well-known NOCH Structured Hard Foam. The statue is created using a 3D printing process. Both the fountain and the Valkyrie are elaborately handcoloured.

**Craft Tip:**  
**How water gets into the fountain**

If you want to make your model even more realistic, you can bring the fountain to life with 'water' by using NOCH 2K Water Gel (ref. 60870) and NOCH Aqua Effects (ref. 60872).

Ideal 'carriers' for splashing water can be cut out of a transparent sheet (e.g. plastic packing material).

Glue the thin strips in the water outlets.

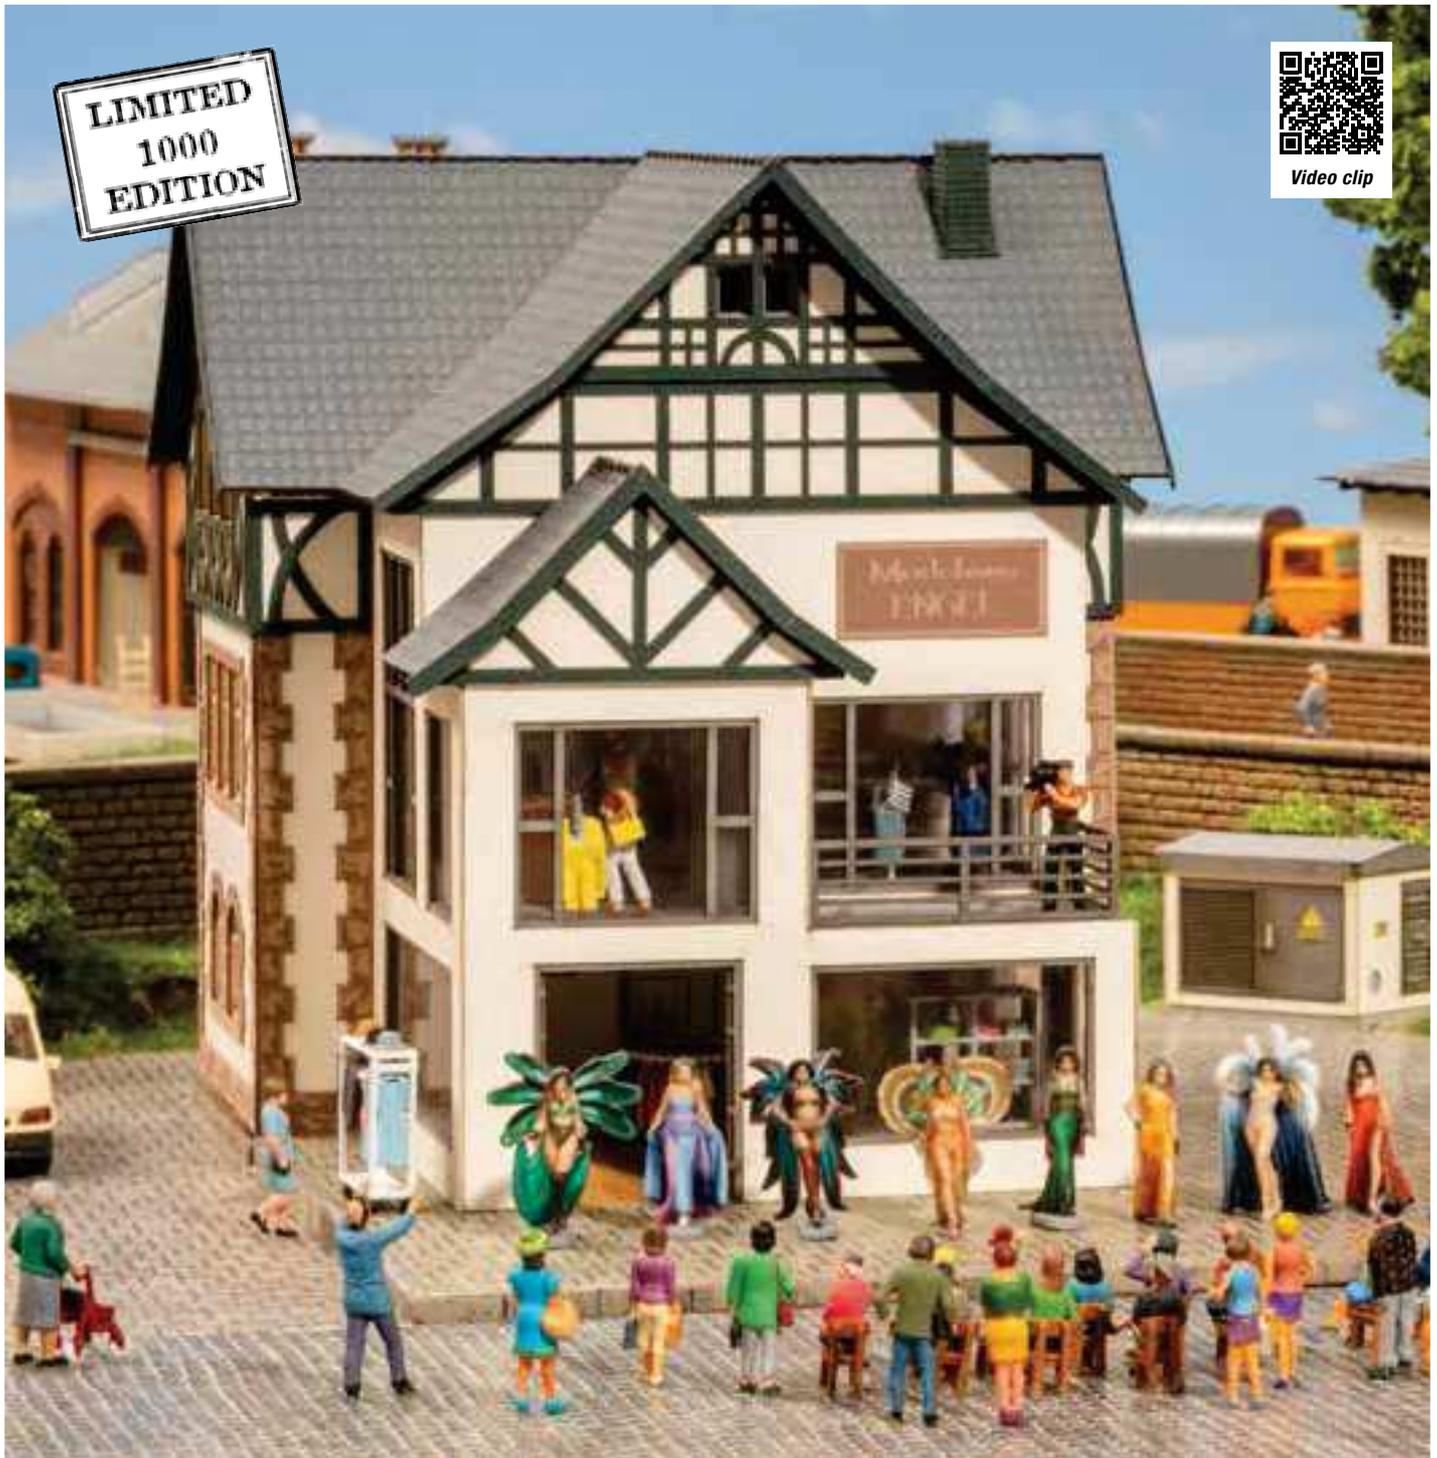

Then pour NOCH 2K Water Gel into the basin of the fountain.

Once hardened, NOCH Aqua Effects is dabbed onto the surface and the strips.

The final details are added with NOCH Foam & Spume (ref. 60862).
